

Azotel Technologies and ISP Supplies announce reseller agreement for the United States

ISP Supplies now offers Azotel's SIMPLer™ OSS solution for Fiber and Wireless ISPs

New Orleans, USA, Mar 15, 2022 – Azotel Technologies and ISP Supplies announced today that they've signed an agreement for ISP Supplies to resell Azotel's products. ISP Supplies already have extensive expertise in the support and distribution of radio and fiber equipment for broadband networks, so adding Azotel's SIMPLer™ Operations Support System (OSS) solution to their product portfolio is a logical step for both companies. For Azotel, it provides an additional distribution channel in the region, while for ISP Supplies it broadens the scope of their portfolio to include B/OSS.

Azotel's SIMPLer™ OSS is a full-featured service provider management platform, used to manage single or multiple ISP businesses from sign-up to disconnect. Important SIMPLer™ OSS features include auto provisioning of radio and fiber equipment, customer portal with automated sign-up, monthly billing and credit card processing, technical support trouble tickets, installation scheduling, inventory management, sales promotions, management reports and more.

"We are currently seeing a further step increase in demand for broadband solutions throughout the USA" said John O'Hare, CEO of Azotel. "While many operators focus entirely on building their network, those that are truly successful pay equal attention to the systems required to effectively manage and operate those networks. This is where our SIMPLer OSS platform comes into its own, by using a single platform which provides all the required management functions for both wireless and fiber."

Azotel's SIMPLer OSS solution will be demonstrated at WISPAmerica 2022 - March 15th – 17th.

About Azotel Technologies (www.azotel.com)

Azotel Technologies develops integrated customer and network management solutions that help Internet Service Providers improve their business operations, services and profitability.
