- Accounts Integration (e.g. SAGE) - Inventory Control
- Automated Business Processes e.g. installation planning

Local operator with the global back-office

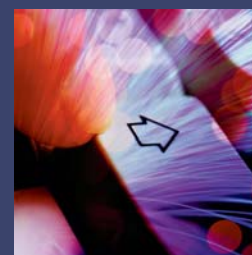

Azotel's **WISPer™** platform provides a complete technical and operations solution for the WISP operator. This allows the operator to focus on customers and not on technology.

Azotel's innovative WISPer-Client box is the only hardware required by the operator (apart from the radio access network).

WISPer™ enables rapid deployment of a proven technology and business model.

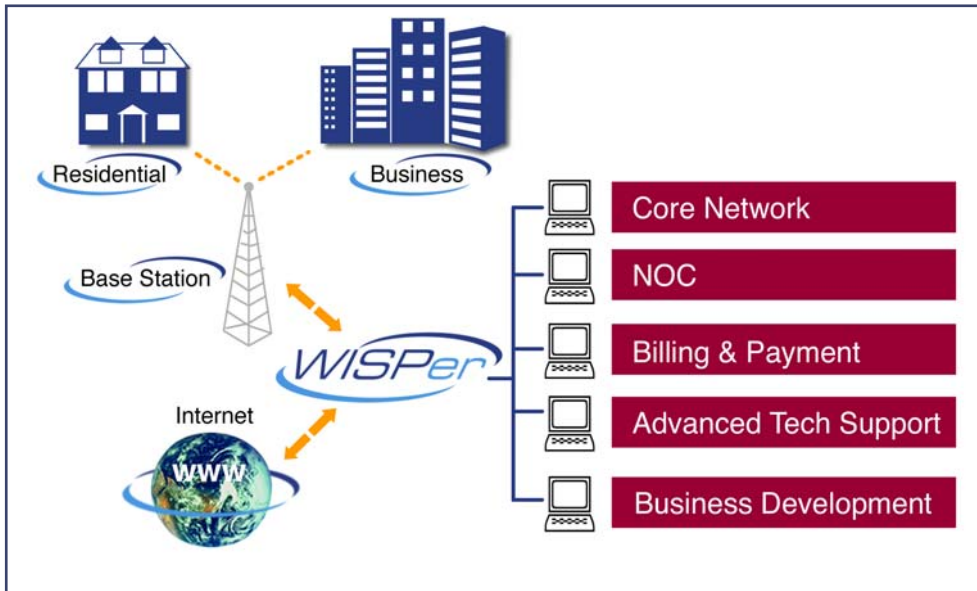

- **All Operator functions** are delivered via one single box.
- The **WISPer™ Service** has been built from practical experience in building and operating Wireless Networks and Broadband Services Provision.
- **Full Managed Service Offering: Billing and Collections**
Focus on your business while Azotel manages administration and interfacing to banking systems.
- The **WISPer-Client** box construction and size allows for external deployment on the roof, for example, by your base station thus negating the need for rack space and internal building access.
- **Highly Cost Effective**
Significantly reducing the barriers of entry and costs to establishing your own Wireless ISP.
- **Rapid Deployment**
Ready to go, when you are. The WISPer-Client is "plug-and-go". Operator interfaces centrally via Azotel's web servers.
- **Proven Solution and Business Model**
Azotel provide the solution, technical expertise and business knowledge to get your business operational.
- **Advanced Services capable**
Azotel's network is future ready for VoIP and other advanced broadband services.

Allowing you to focus on your business - not on technology...

WISPer™ network integration overview

Azotel WISPer™ has been built from practical experience in building and operating Wireless Networks to deliver broadband services. **Azotel's** innovative **WISPer-Client** box is the only hardware deployed in addition to your radio network, delivering all core network functions and enabling full remote Network Management through the Azotel Network Operations Centre. Our browser based interface allows for total access to all systems delivering real-time information on your *Core Network, Network Health, Billing & Payments*.

WISPer™ puts you in total control of your customers, allowing you to focus on your core business and not worry about the technology that's driving it.
