## Broadband for rural mid-west

**Roscommon:** Broadband is to be delivered to 95% of the population in rural mid-west in the next three years. This was announced today by Azotel, who launched its first wireless internet service provider — Azotel-BriskNet — based on the joint hosting365, Motorola and Azotel broadband network.

The service provider is delivering broadband in Roscommon, with plans to move into Galway and Mayo early in 2007.
