Brisk broadband access for West

Azotel has launched its first wireless internet service provider called Azotel-BriskNet.

This offering is based on a joint network infrastructure involving Hosting365, Motorola and Azotel. Azotel-BriskNet, based in Roscommon, has ambitious plans to offer broadband to 95 percent of the population in rural mid-west Ireland within the next three years.

The service provider is currently delivering broadband in Roscommon, with plans to move into Galway and Mayo early in 2007. Motorola's Wi4 Canopy wireless broadband solution was first deployed in Ireland in 2002 in Cork and is now installed in 130 countries by 3200 wireless internet service providers.
